

CIES Eligible*

IMPORTANT INFORMATION

- I. Income Partners Managed Volatility High Yield Bond Fund (the "Fund") invests primarily in high yield debt instruments, which are below investment grade or unrated. The Fund will invest in high yield debt instruments, and as a result may be subject to substantial credit/counterparty risk, credit rating related risks, interest rates risk, liquidity risks, and valuation risks. The investments held by the Fund may fall in value and therefore your investment in the Fund may suffer losses.
- II. The Fund's managed volatility strategy may not achieve the desired results under all circumstances. While the Fund's manager will endeavor to manage the Fund such that it does not exceed its pre-determined annualized volatility target, there is no guarantee that such targets can be reached in all market conditions. Managed volatility does not necessarily mean lower risk and the Fund may still suffer losses.
- III. The Fund is denominated in RMB, and RMB is currently not freely convertible and is subject to exchange controls and restrictions. There is no guarantee that RMB will not depreciate. If you convert Hong Kong Dollar or any other currency into RMB so as to invest in the Fund and subsequently convert the RMB redemption proceeds back into Hong Kong Dollar or any other currency, you may suffer a loss if RMB depreciates against Hong Kong Dollar or other currency. In addition, the underlying investments in the Fund may be denominated in currencies other than RMB. The NAV may be affected favorably by fluctuations in the exchange rates between these currencies and the base currency and by changes in the exchange rate controls.
- IV. The Fund invests in the Greater China region and in the China market and there is subject to emerging market risk including political, economic, legal, regulatory and liquidity risks.
- V. The Fund may invest in derivative transactions such as swaps, futures and forwards for hedging purposes. There is no guarantee that the hedging techniques will be effective.
- VI. In respect of the distribution Units of the Fund (save for Class 2C Dis (USD) Units), the Fund's manager currently intends to make monthly dividend distribution. However, the distribution amount of dividend rate is not guaranteed. In respect of the Class 2C Dis (USD) Units, the Fund's manager makes non-discretionary monthly distributions. For certain classes of Units of the Fund, the Fund's manager may at its discretion pay distributions out of the capital of the Fund. The Fund's manager may also, at its discretion, pay distributions out of gross income, while paying all or part of the fees and expenses of the capital of the Fund, resulting in an increase in distributable income for payment of distributions by the Fund. Therefore the Fund may effectively make payment of dividend out of capital. Payment of distributions out of capital represents a return or withdrawal of part of the amount they originally invested of from any capital gains attributable to the original investment. Any such distributions may result in an immediate reduction of the net asset value per unit of the Fund.
- VII. Investment involves risk. Past performance is not a guarantee or a reliable indicator of future results and no guarantee is being made that similar returns will be achieved in the future.
- VIII. In making investment decisions, investors should not rely solely on the information in this report and should read the offering document of the Fund for further details including the risk factors. This document does not constitute an offering document.

INVESTMENT OBJECTIVE

The Fund seeks to maximize total investment returns, comprising capital appreciation and interest income by primarily investing in high yield debt instruments that are below investment grade or unrated. It aims to deliver high yield returns with a reduced level of volatility compared against the broader high yield market through an active managed volatility strategy by using both quantitative and qualitative measures. The Fund has a geographical focus on Greater China and Asia.

Unless stated otherwise, all data as of 28 February 2025. Source: Income Partners, fund performance is calculated on NAV to NAV basis in denominated currency with dividends re-invested. Performance is presented on a net-of-fees basis. Past performance is not indicative of future results.

1. The award is based on the performance from 1 October 2021 to 30 September 2022. Any awards won are not indicative on Income Partners' future performance. The awards should not be considered an endorsement of Income Partners by any client. The awards may not be representative of any client's experience. Income Partners may be required to pay a fee to participate in the nomination of the award.
2. This document contains fund performance or NAV numbers which may be subject to amendments and further verification by the fund administrator. The fund administrator, rather than the manager, publishes the official fund NAV. Any performance numbers contained herein should not be relied on as official or final NAV of the fund.
3. The total return chart above shows the Fund's total return performance since inception.
4. Annualized Dividend Yield: [(1 + distribution per unit / ex-dividend NAV) * distribution frequency] - 1. Yield figures are estimates and are based on the latest dividend distribution and the ex-dividend NAV of the previous month. Yield figures are for reference only. Positive dividend yield does not imply positive return. Dividend rate is not guaranteed and distributions may be paid from capital. In respect of the Class 2C (USD) Distribution Units, pay out non-discretionary monthly distributions at a fixed percentage of 7% per annum. The 7% annualized yield is calculated as follows: (total dividend paid or to be paid over the current calendar year / last available net asset value of the Fund) in the prior calendar year) x 100%.
5. The calendar performance figures are calculated from share class launch dates to calendar year-end.
6. The Sharpe Ratio is calculated as annualized return minus risk free rate (RFR) divided by annualized standard deviation. RFR is the simple average of 1 year CNH cross-currency swap rate.
7. Yield to Maturity in RMB applies to all Unhedged share classes in RMB (2B), USD (2A), HKD (2D), AUD (2E), SGD (2H), EUR (2J), as investors are exposed to RMB risk.
8. Yield to Maturity in USD applies to all Hedged share classes in USD-Hedged (2G), AUD-Hedged (2F), HKD-Hedged (2L), SGD-Hedged (2I), EUR-Hedged (2K), RMB (USD Exposure) (2X) as investors are not exposed to RMB risk.
9. Where applicable, workout dates are used for the calculation of yield to maturity for callable bonds (sourced from Bloomberg). When calculating average YTM of the Fund, we conservatively use zero yield for defaulted bonds. For bonds with YTM that is greater than 80%, we conservatively apply current yield in place of YTM.
10. Top 10 Holdings is grouped by issuer, the fund may hold multiple issues from the same issuer.

* With effect from 1 March 2024, the fund is an eligible collective investment scheme in the new Capital Investment Entrant Scheme (New CIES) in Hong Kong.

MANAGER'S COMMENTARY¹³

In February, the Asian high yield bond market rallied significantly, posting its strongest monthly gain since May 2024. This robust performance continued January's upward trend, and it was broad-based across market sectors, supported by three key factors:

- The inauguration of the new U.S. administration, with its initial policy announcements, has helped clear market uncertainty and chart a clear forward path. Coupled with emerging optimism about resolving regional conflicts in Europe and the Middle East, these developments have bolstered a global risk-on sentiment.
- An unexpected breakthrough in Chinese AI technology has sparked renewed enthusiasm for global tech development. This milestone, particularly credited to Chinese firms, has drawn renewed attention to Chinese assets and positively influenced other Asian sectors.
- Recent deterioration in key U.S. economic data suggests a potential slowdown, while concerns over tariff policies and fiscal measures (including spending cuts and job reductions) have contributed to a notable decline in U.S. interest rates. In fact, the 10-year Treasury yield fell by more than 30 basis points.

These macro trends, combined with an attractive valuation (with the index yield-to-maturity above 9.4% at the end of February), position the Asian high yield market favorably for the coming year.

MANAGER'S COMMENTARY (Cont'd)¹³

Focusing on sector performance, Hong Kong experienced a strong rebound with a MTD return of 6.2%. After underperforming in December and January amid negative sentiment around New World Development, investors reassessed the oversold bonds in February, leading to a rapid recovery. New World Development posted a remarkable 48% increase, while Lai Sun and Li & Fung delivered gains of 22% and 15%, respectively. In China, robust market sentiment helped the region achieve a 3.2% gain during the month. The property sector led this advance with an 8% increase, buoyed by positive developments at Vanke and national stabilized contracted sales. Additionally, Greentown, a leading privately owned developer, successfully issued a new bond to refinance its maturing debt, further boosting market confidence. Sri Lanka continued its rally following the restructuring completed in December, recording a 2.5% increase, while India, the second-largest region by market capitalization, recorded a 1.5% gain, driven by strong performances from Adani renewable bonds (+6.5% MTD) and UPL Group (+3.6% MTD).

Looking ahead, we remain optimistic about the Asian high yield market for several reasons:

- The market's average yield-to-maturity remains above its historical normal range of 5-8%, with the coupon component contributing roughly 6%. This robust cash flow not only provide visible income but also provides a buffer against price volatility.
- We are entering a favorable phase of the U.S. interest-rate cycle and with Asian high yield credit spreads positioned at the wider end of their historical range (300-500bps), there is potential for further yield compression in the near term.
- With new bond issuances barely keeping pace with maturities, market supply remains limited. This scarcity supports the pricing of existing bonds, particularly as investors continue to seek high-yield opportunities.

Our portfolio strategy remains focused on diversification and risk management. We currently hold over 80 bond positions and ensure that no single issuer accounts for more than 3% of the portfolio. The majority of our capital is allocated to a diversified mix of bonds with stable credit profiles, which form the core of our portfolio and are managed with a buy-and-hold approach to target medium- to long-term carry gains. A smaller portion of our capital is reserved for opportunistic trading, allowing us to capitalize on market volatility driven by macroeconomic shocks, sentiment shifts, corporate developments, and credit events. Effective volatility management remains central to our strategy for the year.

11. The total exposures may vary due to rounding. The credit rating exposures presented here are based on ratings from S&P/Moody's/Fitch or equivalent ratings from other internationally recognized rating agencies. If S&P/Moody's/Fitch ratings for bond holdings are not available, Income Partners applies its internal credit ratings.
